PROFILE

AI/ML developer with hands-on experience building production-grade NLP systems — from RAG pipelines and semantic search to intent classification and LLM-powered assistants. Skilled in Python, Flask, FAISS, and Sentence Transformers, with a track record of shipping end-to-end projects from model training to containerized deployment. Targeting NLP and AI engineering roles where I can build systems that make language models actually useful.

TECHNICAL SKILLS

NLP & AI: spaCy, Sentence Transformers, FAISS, scikit-learn, RAG Pipelines, Prompt Engineering

LLMs & Inference: Gemini AI, Ollama (local LLM), OpenCV, FaceNet

Programming: Python (primary), C++

Web & Backend: Flask, FastAPI, JWT Authentication, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

DevOps & Tools: Docker, Git, GitHub, Render, Jupyter

PROJECTS

IntelliDocs — AI-Powered Multi-User RAG Platform

June 2026

GitHub: github.com/mrdevpatmase/IntelliDocs

- Containerized the application using Docker and integrated PostgreSQL for persistent user management.
- Implemented semantic search using Sentence Transformers and FAISS for context-aware document retrieval.
- Designed JWT-based authentication and PostgreSQL-backed multi-user architecture with document isolation.
- Integrated Gemini AI as the generative backbone, delivering source-grounded responses with citation traceability across isolated user document stores.
- Designed the architecture to support 10+ simultaneous users with fully isolated document namespaces and persistent session state.

Tech: Python, Flask, PostgreSQL, FAISS, Sentence Transformers, Gemini AI, RAG, JWT, Docker

Jarvis — AI-Powered Hybrid Assistant

Aug 2025

Live Demo: jarvis-v2-npel.onrender.com | GitHub: github.com/mrdevpatmase/Jarvis_V2

- Built a hybrid AI assistant using ML-based intent classification with LLM fallback for unseen commands.
- Implemented speech-driven command execution, web automation, and a Flask-based deployed interface with a local LLM engine.
- Developed backend APIs using Flask and integrated multiple assistant functionalities.

Tech: Python, Flask, spaCy, scikit-learn, Ollama (LLM), MongoDB, Git

CivicMind — AI-Powered Grievance Management & Routing System

Feb 2026

GitHub: github.com/mrdevpatmase/CivicMind

- Developed an AI platform to classify and route citizen complaints using NLP and REST APIs.
- Designed end-to-end ML inference pipeline with database integration and scalable backend deployment.
- Trained a multi-class intent classifier on a self-labeled dataset of 250+ complaint samples, achieving 70% accuracy — establishing a baseline for a low-resource domain classification task with no prior benchmark.

Tech: Python, scikit-learn, FastAPI, MongoDB, REST APIs

EXPERIENCE

Web Developer Intern — MotionCut

Early 2025

Remote Internship

- Built and shipped responsive UI components using HTML, CSS, and JavaScript for a client-facing web product.

CERTIFICATIONS

Full Stack Development — Udemy | NLP & Deep Learning — Preplnsta

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

Expected June 2027

Prof. Ram Meghe College of Engineering & Management, Amravati

Relevant coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Computer Networks

Focus areas: Natural Language Processing, AI Systems Design
